

FS2 Knowledge Organiser– Frogs and Pond Life

Books we will be reading:

•Frogs are amphibians. This means they can live in water or on land.

•It takes up to 16 weeks for frogspawn to grow into a frog.

•Frogs drink through their skin.

•Frogs hibernate in winter.

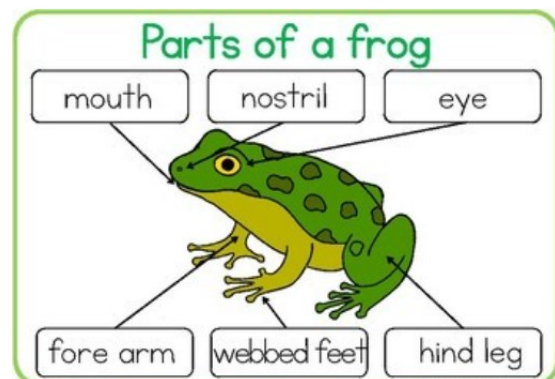

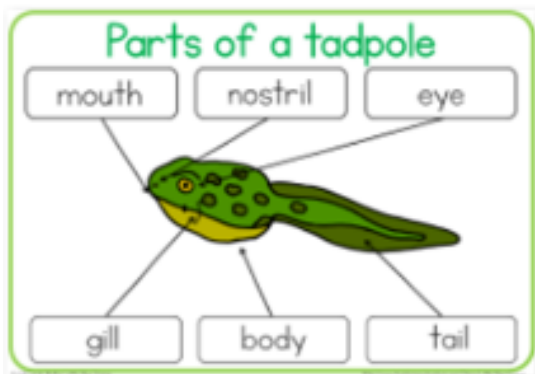

•Poisonous frogs live in the rain-forest and have bright colours.

•Frogs have very strong leg muscles.

•Frogs have been around since the time of the dinosaurs.

•Frogs live all over the world.

•Many people around the world like to eat frog legs.

Things to do at home:

•Play leap frog in your garden.

•Act out the song "Five Green and Speckled Frogs".

•Go to a pond and look for frogs. It is called "Pond Dipping".

•Make the "Frog Life Cycle" in playdough.
