

FSI Knowledge Organiser- Under the Sea

There are hundreds of thousands of different species under the sea.

A large group fish swimming together is called a shoal.

71% of Earth is covered in water.

Scuba divers used special equipment which lets them breathe underwater.

Australia has the world's biggest coral reef system.

Things to do at home:

- Watch BBC Blue Planet.
- Paint/draw/collage a sea creature.
- Look at a globe and find all of the seas and oceans.
- Go to the library and find some non-fiction books about under the sea.
- Play with sea creature toys in water.

Books we will be reading:
