

FSI learning Journey- Summer 1 Week 5

We continued our focus on growing this week. We finished our cress experiment and decided that seeds need light & water to grow well.

We have been continuing patterns when we have a range of resources to choose from. This is something we find tricky so please help by practising at home. E.g. give us a selection of coloured objects and make a red/blue pattern for us to continue.

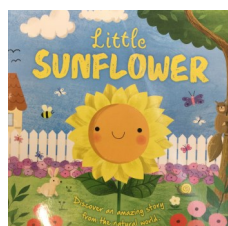

We have been learning the i sound in phonics. Can you find things around your house that start with a i? Can you write i?

FS1 learning Journey- Summer 1 Week 5

"Happy Birthday to you!"
We've been playing birthday parties a lot this week.

We've got some caterpillars.
We are enjoying watching them grow and move around in their tub. We think they will make cocoons and turn into butterflies.

We have been talking about making safe choices. We learnt that a stranger is someone that you do not know. We learnt that even though we are good at swimming we should never go into water without an adult because we might drown and that we shouldn't go for a walk without a grown-up like Goldilocks did!

It's a stranger! We don't go anywhere with strangers.

We practised rolling a ball to a partner.
