

FSI Knowledge Organiser- Summer

Winter

Spring

Autumn

Summer

You should wear clothes that keep you **cool**, such as shorts and T-shirts.

Summer is one of the four **seasons**. It comes after spring and before autumn.

In the summer, the weather is usually warm and can get very hot. It is important to keep **safe** and **healthy** when the weather is hot.

Wearing a sun hat helps to **protect** your head from the heat of the sun. Sunglasses protect your eyes from the **brightness** of the sun.

You should also put on sun cream and drink lots of water.

During the summer, you might see lots of plants and flowers.

The colourful flowers attract lots of minibeasts, such as bees and butterflies.

Things to do at home:

Follow sun safety rules and talk to your child about why you are asking them to wear a hat & sun cream etc.
